Nationality: Spanish

Education

(Fall 2022) | PhD in Robotics 01 / 2019 | University of Girona (Spain) 07 / 2018 | MSc in Mechanical Engineering 09 / 2016 | KU Leuven (Belgium) Robotics & Mechatronics Magna cum laude

07 / 2015 | BSc in Industrial Engineering 09 / 2011 | University of Zaragoza (Spain)

About me

- I'm a **PhD student** at the Underwater Robotics Lab of University of Girona under the supervision of Prof. Pere Ridao.
- My main research interests include exploiting sensor perception for autonomous navigation and manipulation in challenging scenarios.
- **Q** I'm currently investigating novel **non-rigid** data association methods to recover true object shape out of distorted 3D scans.

Research Experience

(Fall 2022) 01 / 2019	PhD candidate at the Underwater Robotics Lab, University of Girona (Spain) Enabling underwater robots to use range data from laser-based sensors for mapping and manipulation tasks. To this end we built an underwater laser scanner, which allowed me to face challenges ranging from sensor calibration to integration in autonomous platforms.
04 / 2022 09 / 2021	Visiting researcher at the Autonomous Systems Lab (ASL), ETH Zurich (Switzerland) Presented a new non-rigid point cloud registration algorithm that corrects motion distortion in dynamic scans, improving accuracy of localization and mapping tasks.
07 / 2018 10 / 2017	MSc thesis at the Mechatronic System Dynamics Lab, KU Leuven (Belgium) Developed a vision-based algorithm capable of reconstructing full-field vibrations of mechanical structures based on observations of natural-frequency deformations.
06 / 2018 11 / 2017	Research intern at The Kobi Company, Leuven (Belgium) Studied the performance of different feature-based stereo matching strategies for the autonomous navigation of the lawn mowing robot.
08 / 2017 06 / 2017	Research intern at Octinion, Leuven (Belgium) Trained a ML classifier to assign ripeness category to berries detected by the autonomous strawberry picking robot.
07 / 2015 01 / 2015	BSc thesis at the Vision for Robotics Lab, TU Vienna (Austria) Compared different feature-based strategies to match 2D floor plan LiDAR scans for autonomous navigation.

Teaching Experience

06 / 2022 Supervisor of autonomous	navigation student projects (6 ECTS)
--------------------------------------	--------------------------------------

03 / 2022 Mentoring master students on their hands-on project: autonomous navigation of a Kobuki base equipped with RGBD and 2D LiDAR.

04 / 2022 | Co-supervisor of two MSc theses

09 / 2021

- Exploring Cycle GANs to add realistic noise distributions to synthetic underwater sonar images.
- · Dense volumetric sonar-based underwater mapping.

01 / 2021 | Lab assistant for computer architecture (6 ECTS)

09 / 2020 Teaching undergraduate lab sessions on logic operators and state machines.

Software Skills

Languages C++, Python, Matlab, CMake
Libraries OpenCV, Ceres, PCL, GTSAM

Misc ROS, git

Languages

Spanish Native

English C1 TOEFL 110/120, April 2015 German C1 EOI Girona, June 2021

Catalan C1 Universitat de Girona, January 2020

Extracurricular Activities

09 / 2018 | Summer intern at Thái Nguyên University of Technology (Vietnam)

07 / 2018 Taught basic ML and English language by developing a facial recognition tool with educational purposes.

2014 | Handball Volunteer coach at AD Corazonistas, Zaragoza (Spain)

2011 | Responsible for teams of children between 10 and 14 years old
